

LiveNote + Realtime

Transcript & Evidence Management Software with Realtime Enablement

Get serious leverage during depositions and trials

Only a small percentage of cases go to trial, which makes depositions the real battleground during litigation. LiveNote® SR software helps you get more from every deposition, organize the facts of the case, and settle cases more favorably.

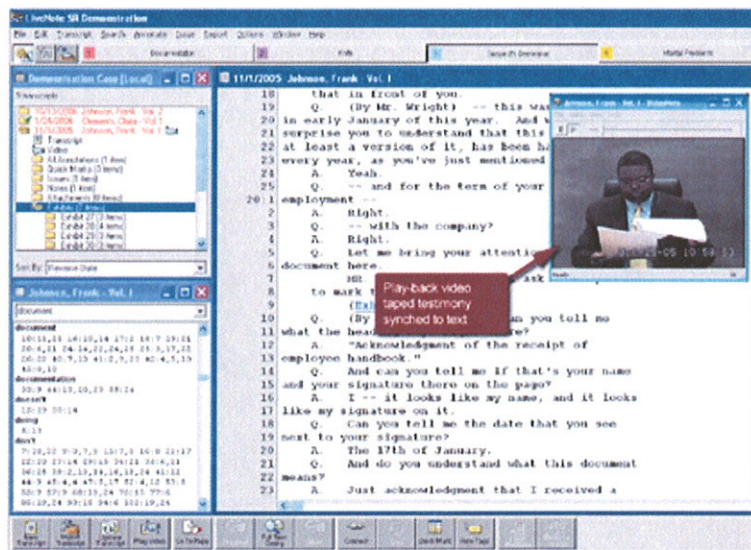

LiveNote SR + Realtime enables you to receive live transcript text, audio and video directly from the court reporter or videographer. You can then mark-up live text as it scrolls on your computer, search earlier testimony to powerfully question a witness, privately communicate with on-site or off-site team members, and complete your deposition summary before leaving the conference room.

So whether you are accessing the testimony from across the table, or your whole team is accessing it from across the country, the live feed will intimidate your opponent and strengthen your presence at the deposition.

The LiveNote SR + Realtime subscription includes enterprise-wide Engate-Compliant™ realtime access – in the deposition room or elsewhere – without the need for individual tokens. In addition to being the only Engate-Compliant realtime software on the market, LiveNote SR also delivers robust transcript and evidence-management tools for summarizing all of the historical transcripts in your case, analyzing exhibits, and getting to the heart of the case.

The Industry Leader

- LiveNote is the #1 most-used software to manage discovery documents and transcripts or to map out a case
- 83% of AmLaw 200 firms use LiveNote
- LiveNote is used in more than 12,000 firms nationwide, and has more than 50,000 users
- LiveNote is the only Engate-Compliant™ Realtime software available

Transcript text, exhibit hyperlinks, and video are all at your fingertips. Review all of the evidence, search the project for key issues and terms, add notes, and generate reports.

LiveNote's realtime transcript and evidence management tools provide serious leverage during and after depositions.

Realtime

- Reduce distractions, read-backs and stalling tactics during depositions
- Participate in live depositions from anywhere – avoiding the time and cost associated with travel
- Enable co-counsel, legal assistants, experts and clients to monitor live events from any Internet-connected war room or office
- Achieve Engage compliance on all realtime events (no other product can do this)
- Use instant messaging during live depositions to get instant – and private – input from anyone connected to your group
- Search realtime transcripts during the live deposition to pinpoint salient points and immediately modify your approach

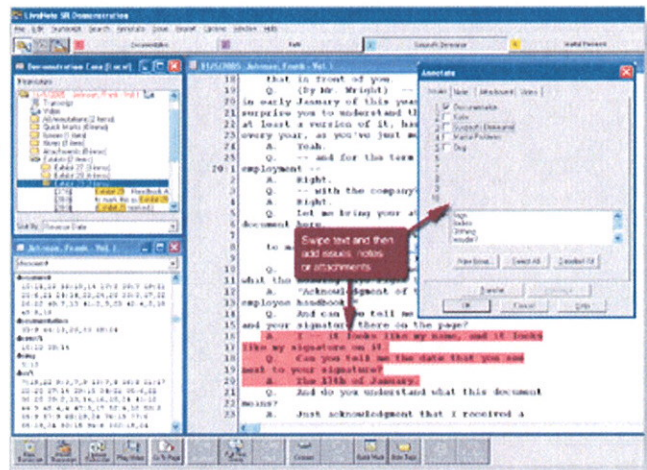

The Realtime transcript text can be accompanied by live audio and video, so remote attendees can truly experience every aspect of the deposition as it happens. LiveNote also enables the play-back of historical video synchronized to the testimony.

Transcript Management

- Effectively manage all the transcripts and related evidence in your case
- Run sophisticated full-text searches across all transcripts in your case to quickly retrieve the most critical testimony
- View hyperlinked exhibits with a single click
- Share cases over a network so that multiple team members can work simultaneously, or save a project locally and synchronize your work to the network case later
- Annotate and analyze all your transcripts – realtime or not
- Create dynamic reports on keywords, issues, annotations and exhibit lists that will automatically update as your case evolves

Annotate the transcript – while the deposition is happening or later during review – by adding issue marks, auto tags, notes, or attachments.
